SUMMARY

I started my career as a UI/UX Designer at a bank, where I developed a strong foundation in creating user-centered and impactful digital products.

To expand my skill set, I transitioned into frontend development through Le Wagon, where I strengthened my ability to turn design concepts into functional and intuitive interfaces.

Currently based in Japan, I am driven by new challenges and continuous learning, with a focus on building seamless user experiences by combining design and development.

CERTIFICATIONS

- JLPT N3 - 12/2025
- Google UX Design Professional Certificate - 04/2025

LANGUAGES

Portuguese — Native/Bilingual

English — Fluent

Japanese — Conversational

SKILLS

JavaScript | HTML & CSS |
React | Ruby on Rails |
Typescript | SQL | Git & Github |
UX/UI Design | Figma

EDUCATION

AI Software Development Bootcamp Le Wagon

01/2026 – 03/2026 | Tokyo, Japan

Full-stack web development fundamentals bootcamp while integrating AI capabilities using Large Language Models (LLMs), practical AI integration, emphasizing collaboration, clean architecture, and production-ready applications.

Graphic Design - Technological Graduation, Universidade Paulista

01/2016 – 12/2017 | SP, Brazil

PROJECTS

Forkcast

Forkcast is a web application designed to simplify time management in the kitchen. It helps users plan their weekly meals and automatically generate organized shopping lists.

EXPERIENCE

Junior UI/UX Designer, BRQ Digital Solutions

10/2021 – 05/2022 | SP, Brazil

- Worked within an Agile, cross-functional team supporting enterprise-level banking platforms for Itaú, collaborating closely with Product Managers and Software Engineers.
- Contributed to UX/UI solutions with a strong focus on feasibility, data structure, and handoff to development, ensuring designs could be efficiently implemented.
- Participated in user research, usability testing, wireframing, and high-fidelity prototyping using Figma, with attention to clarity, consistency, and scalability.
- Assisted in designing role-based information visibility systems, considering data hierarchy, permissions, and user flows aligned with backend constraints.

UI Designer | Freelancer, Frete Mais Seguro

11/2021 – 02/2022 | SP, Brazil

- Led the end-to-end UX/UI design of a B2B platform MVP connecting autonomous truck drivers with cargo owners, from ideation to high-fidelity prototypes.
- Designed responsive user interfaces and complete user flows (onboarding, cargo listing, driver discovery), considering real-world usage and technical constraints.
- Created a conversion-focused landing page that clearly communicated product value and supported investor acquisition.
